AEROMIX Wins Award for Water and Wastewater Plants

AEROMIX Systems, Inc. has been awarded a 33,000 gpd peak flow sea water desalination reverse osmosis system and a complete packaged wastewater treatment system for the Komsomolskoe Oil Field development project in West Kazakhstan. Romanian oil and gas corporation Petrom is overseeing the \$190 million dollar project.

The AEROMIX wastewater treatment system is compact, self-contained, and factory pre-fabricated to reduce time of installation at the project site. The AEROMIX reverse osmosis water treatment system is installed in a shipping container and will efficiently work alongside the wastewater treatment system to provide safe drinking water at the site. AEROMIX also manufactures Compact Water Treatment Plants, aerators, and mixers.

AEROMIX is a world leader in water and wastewater treatment equipment. Contact Melauna Robinson for more information on our water and wastewater treatment equipment.
